DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 4, 2009 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Albert Penilla on June 12, 2009.

The application has been amended as follows:

Claim 9 now depends upon claim 7. The claim now reads:

-- 9. (Currently Amended) The method of claim 7, --

Allowable Subject Matter

Claims 7, 9, 11, 12, 25-31 and 34 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2614

The general concept of reducing noise in a received audio signal from a microphone by enhancing a target signal component with a first filter and blocking the target signal component with a second filter to isolate a noise component through beam-forming techniques was known in the art at the time of the invention as evidenced by Yang et al (US 7,206,418 B2). However, the Examiner has not found prior art that teaches or suggests the modification of Yang in order to periodically calibrate a value of both the first and second filters through a blind source separation scheme that uses second order statistics to separate the target signal component from the noise signal component on a frequency basis, as defined in the independent claims 7, 25 and 31. Other prior art has been cited herein regarding suppressing noise in audio signals, however the other prior art of record also fails to teach or provide suggestion to arrive the combination of the elements and steps presented in the independent claims, again when said elements or steps are collectively considered in regards to each claim. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON R. KURR whose telephone number is (571)272-0552. The examiner can normally be reached on M-F 10:00am to 6:30pm.

Art Unit: 2614

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on (571) 273-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
